

				Positive represents leanings towards Democrats, and negative represents leaning toward Republican. This is used to determine the Tiers of the State. Use 1972	To find out the total electoral vote for D	To find out the total electoral vote for R	This is originally used to identify tier 1 states. If a state can change the election outcome by swinging itself, then it deserves to be tier 1. Tier 2 states can swing but not tier 1.	Tiers allow me to focus on analyzing a few states instead of 50 states.
